Subject: RE: Anticipated schedule for MPCA WQS projects to EPA for Review and/or approval

Angela, thanks for providing this very detailed list. It is very helpful.

Can you tell me more about Miranda Richards and your SSCs. This does not sound familiar but I would like to be on her list. Thanks.

Have a great holiday.

Tom

Subject: Anticipated schedule for MPCA WQS projects to EPA for Review and/or approval

Hi, Tom and Angela,

On the last Region 5 State/EPA call you requested information from each state on their schedule for projects that would be coming to you for review/approval. Here is the anticipated schedule as it stands now. Miranda Richards sends updates quarterly on site-specific modified standards, so those are not included here.

Anticipated Minnesota Water Quality Standards Projects in 2014

Receipt of Triennial Standards Review Comments and Project Inventory

- April 2014

Rulemaking projects for early review

- Antidegradation SONAR and Rule Language (EPA preliminary review 1/14. Adopted and sent to EPA for final review 1/15)
- Tiered Aquatic Life Uses (EPA preliminary review 5/14, final adoption and review schedule pending)
- Class 4A sulfate standard for the production of wild rice or designation of wild rice waters (EPA preliminary review June 2014)

Rulemaking projects with some limited re-review needed

- Use classification changes for Class 7 waters, (draft to EPA by 2/14. Adopted and sent to EPA for final review 12/14)
- Water Variances (EPA review of preliminary draft 2/14. Adopted and sent to EPA for final review 11/14)

Rulemaking projects in need of EPA Approval (60 days)

- River Eutrophication and Total Suspended Solids, June 2014
- Human Health Methods Revision, November 2014

Let Carol or I know if you have any questions.

Thank you,

Angela
